

MET CS 751 – Web Services
Homework 2 (100 Points)

Q1. Following the Homework1, define a *WSDL* as per the following requirements:

- **In the *types* section, import the two schema definitions from Homework1.**
- **Define a *portType* with one operation which takes a purchase order element as input and returns an invoice element as response**
- **Define the binding with document/literal encoding**

Submission:

Zip your project with the WSDL and schema files and upload to the Assignments section before the due date.
